

Nuvap ProSystem N2Smart

QUICK INSTALLATION GUIDE

1 Make sure that you have a Nuvap account and the Nuvap application installed on your mobile phone. Otherwise please download the app and register your account, following the wizard.

2 Connect the device to the power outlet, by using the provided power supply.

NVP210: connect the power supply to the grid plug and the USB-C cable to the connector on the side of the device.

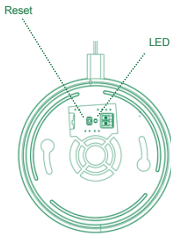

NVP215: the installation must be done by a qualified technician.

3 Wait for the light positioned behind the device to blink blue. Then, open the app on your mobile device and select "add device" from the "Device Manager" menu.

Warning: If the light is solid green, execute the "Reset" procedure.

4 The application will guide the user through the configuration procedure. At the end, the app will notify the end of the configuration procedure.

In case of failure, read the manual and repeat the procedure.

RESET PROCEDURE

1 Be sure the device is correctly powered.

2 Press the reset button on the back side (close to the led), by using a paperclip. Keep it pressed for about 1 seconds.

When the light is blue and intermittent, the device is waiting for the configuration.
